Rye Brook, NY 100573**

(Address of principal executive offices)

NA

(I.R.S. Employer
Identification Number)

83014

(Zip Code)

Registrant's telephone number, including area code: **(917) 793-1965**

Not applicable

(Former name or former address, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on Which Registered
Units, each consisting of one Class A ordinary shares, \$.0001 par value, and one-sixth of one redeemable warrant	GPACU	The Nasdaq Stock Market LLC
Class A ordinary shares included as part of the Units	GPAC	The Nasdaq Stock Market LLC
Redeemable warrants included as part of the units	GPACW	The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted and pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer", "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input checked="" type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of December 22, 2021, there were 30,000,000 shares of the Company's Class A ordinary shares and 7,500,000 shares of the Company's Class B ordinary shares issued and outstanding.

GLOBAL PARTNER ACQUISITION CORP II

EXPLANATORY NOTE

Global Partner Acquisition Corp. II (the “Company,” “GPAC II,” “we”, “our” or “us”) is filing this Amendment No. 1 to its Quarterly Report on Form 10-Q (this “Amendment” or this “Form 10Q/A”) for the period ended September 30, 2020, originally filed with the Securities and Exchange Commission (“SEC”), on November 12, 2021, (the “Original Filing”) to restate its condensed financial statements as of and for the periods ended June 30, 2021 and March 31, 2021 in the accompanying notes to the financial statements included in this Amendment, including describing the restatement and its impact on previously reported amounts. The restatement of the Company’s balance sheet as of January 14, 2021 will be included in a subsequent filing.

On November 12, 2021, the Company publicly filed the Original Filing. In the course of preparing the Original Filing, the Company had determined, in consultation with its accounting consultants that a change was required to be made in the manner in which the Company had previously reported the value of the redeemable Class A ordinary shares issued in connection with the Company’s initial public offering (“**IPO**”). The Company had previously presented the aggregate value of such redeemable Class A ordinary shares was equal to their aggregate redemption value after taking into account the prohibition, under the Company’s Amended and Restated Memorandum and Articles of Association, against the Company repurchasing or redeeming Class A ordinary shares or entering into a business combination if such transaction would cause the Company’s net tangible assets to fall below \$5,000,001. However, in the course of preparing the Original Filing, the Company determined, in consultation with its accounting consultants that, because each Class A ordinary share was, by its terms, redeemable, the aggregate value of the Class A ordinary shares should be equal to their aggregate redemption value without taking into account the foregoing prohibition. The Company adopted this change in the Original Filing by reclassifying the requisite amount of Class A ordinary shares from permanent to temporary equity, with the offset recorded to additional paid-in capital (to the extent available), accumulated deficit and ordinary shares. In the Original Filing, the Company also revised its earnings per share calculation to allocate net income (loss) pro rata among its Class A and Class B ordinary shares. This presentation contemplates an initial business combination as the most likely outcome of the Company’s operations, in which case, both classes of ordinary shares share pro rata in the income (loss) of the Company.

The Company presented the reclassification, and the change in earnings (loss) per share, as a revision that did not require the restatement of previously issued financial statements and presented the effect of the reclassification on the Company’s previously issued financial statements in Note 7 to the condensed financial statements in the Original Filing. After filing the Original Filing on November 12, 2021, in November 2021, the Company became aware of guidance that such revisions, because of their quantitative materiality, should be considered restatements rather than revisions. Upon further review, and in consultation with its accounting consultants and Audit Committee, the Company has updated Note 7 in this Form 10Q/A to indicate that the reclassification, and the change in earnings (loss) per share, constitute a restatement and not a revision and also to include in such Note 7 the restatement of net income (loss) per share on its previously issued financial statements.

In addition, the Company’s management has concluded that, during the periods referred to above, to the extent that the Company’s internal control over financial reporting did not result in the classification of the entire aggregate value of the Class A ordinary shares as temporary equity, and did not allocate net income (loss) pro rata among the Class A and Class B ordinary shares for purposes of presenting earnings (loss) per share, the Company’s disclosure controls and procedures were not effective, which represents a material weakness.

The changes described do not have any impact on the Company’s cash position, the balance held in its trust account or its total assets.

Global Partner Acquisition Corp II

Notes to Condensed Financial Statements

Note 1 – Description of Organization and Business Operations

Global Partner Acquisition Corp II (the “Company”) was incorporated in the Cayman Islands as an exempt company on November 3, 2020. The Company was formed for the purpose of effecting a merger, capital share exchange, asset acquisition, share purchase, reorganization or similar business combination with one or more businesses (the “Business Combination”). The Company is an “emerging growth company,” as defined in Section 2(a) of the Securities Act of 1933, as amended, or the “Securities Act,” as modified by the Jumpstart Our Business Startups Act of 2012 (the “JOBS Act”).

At September 30, 2021, the Company had not commenced any operations. All activity for the period from November 3, 2020 (inception) to September 30, 2021 relates to the Company’s formation and the initial public offering (“Public Offering”) described below and, subsequent to the Public Offering, identifying and completing a suitable Business Combination. The Company will not generate any operating revenues until after completion of its initial Business Combination, at the earliest. The Company expects to generate non-operating income in the form of interest income on cash from the proceeds derived from the Public Offering. The Company has selected December 31 as its fiscal year end.

All dollar amounts are rounded to the nearest thousand dollars.

Sponsor and Public Offering:

The Company’s sponsor is Global Partner Sponsor II LLC, a Delaware limited liability company (the “Sponsor”). The Company intends to finance a Business Combination with proceeds from the \$300,000,000 Public Offering (Note 3) and a \$8,350,000 private placement (Note 4). Upon the closing of the Public Offering and the private placement, \$300,000,000 was deposited in a trust account (the “Trust Account”) at closing on January 14, 2021.

The Trust Account:

The funds in the Trust Account can only be invested in U.S. government treasury bills with a maturity of one hundred and eighty-five (185) days or less or in money market funds meeting certain conditions under Rule 2a-7 under the Investment Company Act of 1940 which invest only in direct U.S. government obligations. Funds will remain in the Trust Account until the earlier of (i) the consummation of its initial Business Combination or (ii) the distribution of the Trust Account as described below. The remaining funds outside the Trust Account may be used to pay for business, legal and accounting due diligence on prospective acquisition targets and continuing general and administrative expenses.

The Company’s amended and restated memorandum and articles of association provides that, other than the withdrawal of interest to pay tax obligations, if any, less up to \$100,000 of interest to pay dissolution expenses, none of the funds held in trust will be released until the earliest of: (a) the completion of the initial Business Combination, (b) the redemption of any public shares properly submitted in connection with a shareholder vote to amend the Company’s amended and restated certificate of incorporation (i) to modify the substance or timing of the Company’s obligation to redeem 100% of the public shares if the Company does not complete the initial Business Combination within 24 months, January 14, 2023, from the closing of the Public Offering, or (ii) with respect to any other provision relating to shareholders’ rights or pre-Business Combination activity, and (c) the redemption of the public shares if the Company is unable to complete the initial Business Combination within 24 months, by January 14, 2023, from the closing of the Public Offering, subject to applicable law. The proceeds deposited in the Trust Account could become subject to the claims of creditors, if any, which could have priority over the claims of our public shareholders.

Business Combination:

The Company’s management has broad discretion with respect to the specific application of the net proceeds of the Public Offering, although substantially all of the net proceeds of the Public Offering are intended to be generally applied toward consummating a Business Combination with (or acquisition of) a Target Business. As used herein, “Target Business” is one or more target businesses that together have a fair market value equal to at least 80% of the balance in the Trust Account (less any taxes payable on interest earned) at the time of signing a definitive agreement in connection with the Company’s initial Business Combination. There is no assurance that the Company will be able to successfully effect a Business Combination.

The Company, after signing a definitive agreement for a Business Combination, will either (i) seek shareholder approval of the Business Combination at a meeting called for such purpose in connection with which shareholders may seek to redeem their shares, regardless of whether they vote for or against the Business Combination, for cash equal to their pro rata share of the aggregate amount then on deposit in the Trust Account as of two business days prior to the consummation of the initial Business Combination, including interest but less taxes payable and amounts released for taxes, or (ii) provide shareholders with the opportunity to have their shares redeemed by the Company by means of a tender offer (and thereby avoid the need for a shareholder vote) for an amount in cash equal to their pro rata share of the aggregate amount then on deposit in the Trust Account as of two business days prior to commencement of the tender offer, including interest but less taxes payable and amounts released to the Company for working capital. The decision as to whether the Company will seek shareholder approval of the Business Combination or will allow shareholders to sell their shares in a tender offer will be made by the Company, solely in its discretion, and will be based on a variety of factors such as the timing of the transaction and whether the terms of the transaction would otherwise require the Company to seek shareholder approval unless a vote is required by the rules of the Nasdaq Capital Market. If the Company seeks shareholder approval, it will complete its Business Combination only if a majority of the outstanding shares of Class A and Class B ordinary shares voted are voted in favor of the Business Combination. However, in no event will the Company redeem its public shares in an amount that would cause its net tangible assets to be less than \$5,000,001 upon consummation of a Business Combination. In such case, the Company would not proceed with the redemption of its public shares and the related Business Combination, and instead may search for an alternate Business Combination.

If the Company holds a shareholder vote or there is a tender offer for shares in connection with a Business Combination, a public shareholder will have the right to redeem its shares for an amount in cash equal to its pro rata share of the aggregate amount then on deposit in the Trust Account as of two business days prior to the consummation of the initial Business Combination, including interest but less taxes payable and amounts released to the Company for working capital. As a result, such shares of Class A ordinary shares are recorded at redemption amount and classified as temporary equity upon the completion of the Public Offering, in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 480, “Distinguishing Liabilities from Equity.” The amount in the Trust Account is initially funded at \$10.00 per public Class A ordinary share (\$300,000,000 held in the Trust Account divided by 30,000,000 public shares).

The Company will have 24 months, until January 14, 2023, from the closing date of the Public Offering to complete its initial Business Combination. If the Company does not complete a Business Combination within this period of time, it shall (i) cease all operations except for the purposes of winding up; (ii) as promptly as reasonably possible, but not more than ten business days thereafter, redeem the public shares of Class A ordinary shares for a per share pro rata portion of the Trust Account, including interest, but less taxes payable and amounts released to the Company for working capital (less up to \$100,000 of such net interest to pay dissolution expenses) and (iii) as promptly as possible following such redemption, dissolve and liquidate the balance of the Company’s net assets to its creditors and remaining shareholders, as part of its plan of dissolution and liquidation. The initial shareholders have entered into letter agreements with us, pursuant to which they have waived their rights to participate in any redemption with respect to their Founders Shares; however, if the initial shareholders or any of the Company’s officers, directors or affiliates acquire shares of Class A ordinary shares in or after the Public Offering, they will be entitled to a pro rata share of the Trust Account upon the Company’s redemption or liquidation in the event the Company does not complete a Business Combination within 24 months, January 14, 2023, from the closing of the Public Offering.

In the event of such distribution, it is possible that the per share value of the residual assets remaining available for distribution (including Trust Account assets) will be less than the price per Unit (as defined below in Note 3) in the Public Offering.

Note 2 – Summary of Significant Accounting Policies

Basis of Presentation:

The accompanying unaudited condensed interim financial statements of the Company are presented in U.S. dollars and in conformity with accounting principles generally accepted in the United States of America (“GAAP”) pursuant to the rules and regulations of the SEC and reflect all adjustments, consisting only of normal recurring adjustments, which are, in the opinion of management, necessary for a fair presentation of the financial position as of September 30, 2021, and the results of operations and cash flows for the periods presented. Certain information and disclosures normally included in financial statements prepared in accordance with GAAP have been omitted pursuant to such rules and regulations. Interim results are not necessarily indicative of results for a full year or any future periods.

The accompanying unaudited condensed interim financial statements should be read in conjunction with the Company’s audited financial statements and notes thereto included in the Company’s final prospectus dated January 11, 2021, as well as the Company’s audited financial statements included in the Company’s Annual Report on Form 10-K filed with the SEC on March 11, 2021.

At September 30, 2021, the Company has approximately \$969,000 in cash and approximately \$1,527,000 in negative working capital. The Company has incurred and expects to continue to incur significant costs in pursuit of its Business Combination. These conditions raise substantial doubt about the Company’s ability to continue as a going concern for a period of time within one year after the date that the financial statements are issued. There is no assurance that the Company’s plans to consummate a Business Combination will be successful or successful within the Combination Period. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Emerging Growth Company:

Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies (that is, those that have not had a Securities Act registration statement declared effective or do not have a class of securities registered under the Exchange Act) are required to comply with the new or revised financial accounting standards. The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such an election to opt out is irrevocable. The Company has elected not to opt out of such extended transition period which means that when an accounting standard is issued or revised and it has different application dates for public or private companies, the Company, as an emerging growth company, can adopt the new or revised standard at the time private companies adopt the new or revised standard.

Net Income (Loss) per Share:

Net income (loss) per ordinary share is computed by dividing net income (loss) applicable to ordinary shareholders by the weighted average number of ordinary shares outstanding for the period. The Company has not considered the effect of the warrants sold in the Public Offering and Private Placement to purchase an aggregate of 15,566,667 Class A ordinary shares in the calculation of diluted income (loss) per share, since their inclusion would be anti-dilutive under the treasury stock method. As a result, diluted income (loss) per ordinary share is the same as basic loss per ordinary share for the period.

The Company complies with the accounting and disclosure requirements of FASB ASC Topic 260, “Earnings Per Share.” The Company has two classes of shares, which are referred to as Class A ordinary shares and Class B ordinary shares. Income and losses are shared pro rata among the two classes of shares. Net income (loss) per ordinary share is calculated by dividing the net income (loss) by the weighted average number of ordinary shares outstanding during the respective period.

The following table reflects the earnings per share after allocating income between the shares based on outstanding shares.

	Three months ended September 30, 2021		Nine months ended September 30, 2021	
	Class A	Class B	Class A	Class B
<i>Numerator:</i>				
Basic and diluted net income per ordinary share:				
Allocation of income – basic and diluted	\$ 1,205,000	\$ 301,000	\$ 3,340,000	\$ 835,000
<i>Denominator:</i>				
Basic and diluted weighted average ordinary shares:	30,000,000	7,500,000	28,462,000	7,468,000
Basic and diluted net income per ordinary share	\$ 0.04	\$ 0.04	\$ 0.12	\$ 0.12

Concentration of Credit Risk:

Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash accounts in a financial institution, which at times, may exceed the Federal depository insurance coverage of \$250,000. The Company has not experienced losses on these accounts and management believes the Company is not exposed to significant risks on such accounts.

Financial Instruments:

The fair value of the Company’s assets and liabilities (excluding the Warrant liability), which qualify as financial instruments under Financial Accounting Standards Board Accounting Standards Codification (“FASB ASC 820”), “Fair Value Measurements and Disclosures,” approximates the carrying amounts represented in the financial statements, primarily due to their short-term nature.

Use of Estimates:

The preparation of financial statements in conformity with GAAP requires the Company’s management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the balance sheet and the reported amounts of expenses during the reporting period. Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statement, which management considered in formulating its estimate, could change in the near term due to one or more future confirming events. One of the more significant estimates included in these financial statements is the determination of the fair value of the warrant liability. Such estimates may be subject to change as more current information becomes available and accordingly the actual results could differ significantly from those estimates.

Deferred Offering Costs:

The Company complies with the requirements of the FASB ASC 340-10-S99-1 and SEC Staff Accounting Bulletin (SAB) Topic 5A— “Expenses of Offering.” Costs incurred in connection with preparation for the Public Offering total approximately \$17,054,000 including \$16,500,000 of underwriters’ discount. Such costs were allocated among the equity and warrant liability components and approximately \$16,254,000 has been charged to equity for the equity components based on the relative fair-value of the warrants and approximately \$800,000 has been charged to other expense for the warrant liability components upon completion of the Public Offering.

Class A Ordinary Shares Subject to Possible Redemption:

As discussed in Note 3, all of the 30,000,000 Class A ordinary shares sold as part of the Units in the Public Offering contain a redemption feature that allows for the redemption under the Company’s liquidation or tender offer/shareholder approval provisions. In accordance with FASB ASC 480, redemption provisions not solely within the control of the Company require the security to be classified outside of permanent equity. Ordinary liquidation events, which involve the redemption and liquidation of all of the entity’s equity instruments, are excluded from the provisions of FASB ASC 480. Although the Company had not specified a maximum redemption threshold, its articles of association provide that in no event will it redeem its Public Shares in an amount that would cause its net tangible assets (shareholders’ equity) to be less than \$5,000,001. However, because all of the Class A ordinary shares are redeemable, all of the shares are recorded as Class A ordinary shares subject to redemption on the enclosed balance sheet. See also, Note 7, regarding a revision to the presentation of redeemable shares in these financial statements and the effect on previously reported financial statements.

The Company recognizes changes immediately as they occur and adjusts the carrying value of the securities at the end of each reporting period. Increases or decreases in the carrying amount of redeemable Class A ordinary shares are affected by adjustments to additional paid-in capital. Accordingly, at September 30, 2021, 30,000,000 of the 30,000,000 Public Shares were classified outside of permanent equity. Class A ordinary shares subject to redemption consist of:

Gross proceeds of Public Offering	\$ 300,000,000
Less: Proceeds allocated to Public Warrants	(14,100,000)
Offering costs	(16,254,000)
Plus: Accretion of carrying value to redemption value	30,354,000
Class A ordinary shares subject to redemption	<u>\$ 300,000,000</u>

Income Taxes:

FASB ASC 740 prescribes a recognition threshold and a measurement attribute for the balance sheet recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The Company's management determined that the Cayman Islands is the Company's major tax jurisdiction. There were no unrecognized tax benefits as of September 30, 2021. The Company recognizes interest and penalties related to unrecognized tax benefits as income tax expense. No amounts were accrued for the payment of interest and penalties at September 30, 2021. The Company is currently not aware of any issues under review that could result in significant payments, accruals or material deviation from its position. The Company is subject to income tax examinations by major taxing authorities since inception.

The Company is considered an exempted Cayman Islands Company and is presently not subject to income taxes or income tax filing requirements in the Cayman Islands or the United States. As such, the Company's tax provision was zero for the period presented. The Company's management does not expect that the total amount of unrecognized tax benefits will materially change over the next twelve months.

Warrant Liability:

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance in "FASB ASC 480, "Distinguishing Liabilities from Equity" ("ASC 480") and ASC 815, "Derivatives and Hedging" ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own ordinary shares, among other conditions for equity classification. This assessment, which requires the use of professional judgment, is conducted at the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded as a liability at their initial fair value on the date of issuance, and each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the statement of operations. Costs associated with issuing the warrants accounted for as liabilities are charged to operations when the warrants are issued.

Recent Accounting Pronouncements:

In August 2020, the FASB issued Accounting Standards Update ("ASU") 2020-06, "Debt — Debt with Conversion and Other Options" (Subtopic 470-20) and "Derivatives and Hedging — Contracts in Entity's Own Equity" (Subtopic 815-40) ("ASU 2020-06") to simplify accounting for certain financial instruments. ASU 2020-06 eliminates the current models that require separation of beneficial conversion and cash conversion features from convertible instruments and simplifies the derivative scope exception guidance pertaining to equity classification of contracts in an entity's own equity. The new standard also introduces additional disclosures for convertible debt and freestanding instruments that are indexed to and settled in an entity's own equity. ASU 2020-06 amends the diluted earnings per share guidance, including the requirement to use the if-converted method for all convertible instruments. ASU 2020-06 is effective January 1, 2022 and should be applied on a full or modified retrospective basis, with early adoption permitted beginning on January 1, 2021. The Company is currently evaluating the impact that the pronouncement will have on the financial statements.

Management does not believe that any other recently issued, but not yet effective, accounting pronouncements, if currently adopted, would have a material effect on the Company's condensed financial statements.

Subsequent Events:

The Company evaluated subsequent events and transactions that occurred after the date of the balance sheet through the date that the condensed financial statements were available to be issued and has concluded that all such events that would require adjustment or disclosure in the condensed financial statement have been recognized or disclosed.

Note 3 – Public Offering

On January 14, 2021, the Company consummated the Public Offering and sale of 30,000,000 units at a price of \$10.00 per unit (the "Units"). Each Unit consists of one share of the Company's Class A ordinary shares, \$0.0001 par value, one-sixth of one detachable redeemable warrant (the "Detachable Redeemable Warrants") and the contingent right to receive, in certain circumstances, in connection with the business combination, one-sixth of one distributable redeemable warrant for each public share that a public shareholder holds and does not redeem in connection with the Company's initial business combination (the "Distributable Redeemable Warrants"). Each whole Redeemable Warrant offered in the Public Offering is exercisable to purchase one share of the Company's Class A ordinary shares. Only whole Redeemable Warrants may be exercised. Under the terms of the warrant agreement, the Company has agreed to use its best efforts to file a new registration statement under the Securities Act, following the completion of the Company's initial Business Combination. No fractional shares will be issued upon exercise of the Redeemable Warrants. If, upon exercise of the Redeemable Warrants, a holder would be entitled to receive a fractional interest in a share, the Company will, upon exercise, round down to the nearest whole number the number of shares of Class A ordinary shares to be issued to the Redeemable Warrant holder. Each Redeemable Warrant will become exercisable on the later of 30 days after the completion of the Company's initial Business Combination or 12 months from the closing of the Public Offering and will expire five years after the completion of the Company's initial Business Combination or earlier upon redemption or liquidation. However, if the Company does not complete its initial Business Combination on or prior to the 24-month period, January 14, 2023, allotted to complete the Business Combination, the Redeemable Warrants will expire at the end of such period. If the Company is unable to deliver registered Class A ordinary shares to the holder upon exercise of a Redeemable Warrant during the exercise period, there will be no net cash settlement of these Redeemable Warrants and the Redeemable Warrants will expire worthless, unless they may be exercised on a cashless basis in the circumstances described in the warrant agreement. Once the Redeemable Warrants become exercisable, the Company may redeem the outstanding Redeemable Warrants in whole and not in part at a price of \$0.01 per Warrant upon a minimum of 30 days' prior written notice of redemption, only in the event that the last sale price of the Class A ordinary shares equals or exceeds \$18.00 per share for any 20 trading days within the 30-trading day period ending on the third trading day before the Company sends the notice of redemption to the Redeemable Warrant holders, and that certain other conditions are met. Once the Redeemable Warrants become exercisable, the Company may also redeem the outstanding Redeemable Warrants in whole and not in part at a price of \$0.10 per Warrant upon a minimum of 30 days' prior written notice of redemption, only in the event that the closing price of the Class A ordinary shares equals or exceeds \$10.00 per share on the trading day prior to the date on which the Company sends the notice of redemption, and that certain other conditions are met. If the closing price of the Class A ordinary shares is less than \$18.00 per share (as adjusted) for any 20 trading days within a 30-trading day period ending three trading days before the Company sends the notice of redemption to the warrant holders, the Private Placement Warrants must also concurrently be called for redemption on the same terms as the outstanding Public Warrants, as described above. If issued, the Distributable Redeemable Warrants are identical to the Redeemable Warrants.

The Company had granted the underwriters a 45-day option to purchase up to 2,500,000 Units to cover any over-allotments, at the Public Offering price less the underwriting discounts and commissions and such option was exercised in full at the closing of the Public Offering and included in the 30,000,000 Units sold on January 14, 2021.

The Company paid an underwriting discount of 2.0% of the per Unit price, \$6,000,000, to the underwriters at the closing of the Public Offering and there is a deferred underwriting fee of 3.5% of the per Unit price, \$10,500,000, which is payable upon the completion of the Company's initial business combination.

Note 4 – Related Party Transactions

Founder Shares:

During 2020, the Sponsor purchased 7,187,500 Class B ordinary shares (the "Founder Shares") for \$25,000 (which amount was paid directly for organizational costs and costs of the Public Offering by the Sponsor on behalf of the Company), or approximately \$0.003 per share. In January 2021, the Company effected a share capitalization resulting in there being an aggregate of 7,500,000 Founder Shares issued. The Founder Shares are substantially identical to the Class A ordinary shares included in the Units sold in the Public Offering except that the Founder Shares automatically convert into shares of Class A ordinary shares at the time of the initial Business Combination, or at any time prior thereto at the option of the holder, and are subject to certain transfer restrictions, as described in more detail below, and the Founder Shares are subject to vesting as follows: 50% upon the completion of a business combination and then 12.5% on each of the attainment of Return to Shareholders (as defined in the agreement) exceeding 20%, 30%, 40% and 50%. Certain events, as defined in the agreement, could trigger an immediate vesting under certain circumstances. Founder Shares that do not vest within an eight-year period from the closing of the business combination will be cancelled.

The Sponsor agreed to forfeit up to 625,000 Founder Shares to the extent that the over-allotment option was not exercised in full by the underwriters. The underwriters' exercised their over-allotment option in full and therefore such shares are no longer subject to forfeiture.

In addition to the vesting provisions of the Founder Shares discussed in Note 8, the Company's initial shareholders have agreed not to transfer, assign or sell any of their Founder Shares until the earlier of (A) one year after the completion of the Company's initial Business Combination, or (B), subsequent to the Company's initial Business Combination, if (x) the last sale price of the Company's Class A ordinary shares equals or exceeds \$12.00 per share (as adjusted for share splits, share dividends, reorganizations, recapitalizations and the like) for any 20 trading days within any 30-trading day period commencing at least 150 days after the Company's initial Business Combination or (y) the date on which the Company completes a liquidation, merger, share exchange or other similar transaction after the initial Business Combination that results in all of the Company's shareholders having the right to exchange their ordinary shares for cash, securities or other property.

Private Placement Warrants:

The Sponsor purchased from the Company an aggregate of 5,566,667 warrants at a price of \$1.50 per warrant (a purchase price of \$8,350,000) in a private placement that occurred simultaneously with the completion of the Public Offering (the "Private Placement Warrants"). Each Private Placement Warrant entitles the holder to purchase one Class A ordinary share at \$11.50 per share. The purchase price of the Private Placement Warrants was added to the proceeds from the Public Offering, net of expenses of the offering and working capital to be available to the Company, to be held in the Trust Account pending completion of the Company's initial Business Combination. The Private Placement Warrants (including the Class A ordinary shares issuable upon exercise of the Private Placement Warrants) will not be transferable, assignable or salable until 30 days after the completion of the initial Business Combination and they will be non-redeemable so long as they are held by the Sponsor or its permitted transferees. If the Private Placement Warrants are held by someone other than the Sponsor or its permitted transferees, the Private Placement Warrants will be redeemable by the Company and exercisable by such holders on the same basis as the warrants included in the Units being sold in the Public Offering. Otherwise, the Private Placement Warrants have terms and provisions that are identical to those of the Redeemable Warrants being sold as part of the Units in the Public Offering and have no net cash settlement provisions.

If the Company does not complete a Business Combination, then the proceeds from the sale of the Private Placement Warrants will be part of the liquidating distribution to the public shareholders and the Private Placement Warrants issued to the Sponsor will expire worthless.

Registration Rights:

The Company's initial shareholders and the holders of the Private Placement Warrants are entitled to registration rights pursuant to a registration and shareholder rights agreement. These holders will be entitled to make up to three demands, excluding short form registration demands, that the Company register such securities for sale under the Securities Act. In addition, these holders will have "piggy-back" registration rights to include their securities in other registration statements filed by the Company. The Company will bear the expenses incurred in connection with the filing of any such registration statements. There will be no penalties associated with delays in registering the securities under the registration and shareholder rights agreement.

Related Party Loans:

In November 2020, the Sponsor agreed to loan the Company up to an aggregate of \$300,000 by drawdowns of not less than \$1,000 each against the issuance of an unsecured promissory note (the "Note") to cover expenses related to the Public Offering. The Note was non-interest bearing and payable on the earlier of June 30, 2021 or the completion of the Public Offering. As of January 13, 2021, the Company had drawn down approximately \$199,000 under the Note, including approximately \$49,000 of costs paid directly by the Sponsor, for costs related to costs of the Public Offering. On January 14, 2021, upon closing of the Public Offering, all amounts outstanding under the Note were repaid.

Administrative Services Agreement:

The Company has agreed to pay \$25,000 a month to the Sponsor for the services to be provided by one or more investment professionals, creation and maintenance of the Company's website, and miscellaneous additional services. Services will commence on the date the securities are first listed on the Nasdaq Capital Market and will terminate upon the earlier of the consummation by the Company of an initial Business Combination or the liquidation of the Company. Approximately \$75,000 and \$213,000, respectively, was paid and charged to general and administrative expenses during the three and nine months ended September 30, 2021 for this agreement and there were no amounts payable or accrued at that date.

Note 5 – Accounting for Warrant Liability, Correction of Previously Issued Balance Sheet and Fair Value of Warrants

At September 30, 2021, there were 15,566,667 warrants outstanding including 10,000,000 Public Warrants and 5,566,667 Private Placement Warrants.

The Company accounts for its warrants outstanding as liabilities consistent with the "Staff Statement on Accounting and Reporting Considerations for Warrants Issued by Special Purpose Acquisition Companies (SPAC's)" issued on April 12, 2021 by the staff (the "Staff") of the Division of Corporation Finance of the SEC. The Staff Statement, among other things, highlights the potential accounting implications of certain terms that are common in warrants issued in connection with the initial public offerings of special purpose acquisition companies ("SPAC") and calls into question the common practice among SPAC's, including the Company, of classifying the public and private warrants issued in connection with the SPAC's public offering as equity. As a result of this guidance, the Company's management further evaluated its public and private warrants under Accounting Standards Codification ("ASC") Subtopic 815-40, Contracts in Entity's Own Equity including with the assistance of accounting and valuation consultants and concluded that the Company's warrants are not indexed to the Company's ordinary shares in the manner contemplated by ASC Section 815-40-15 because the holder of the instrument is not an input into the pricing of a fixed-for-fixed option on equity shares.

In its closing balance sheet as of January 14, 2021 prepared in connection with the Public Offering and filed with the SEC on January 21, 2021, the Company accounted for its outstanding public and private warrants as components of equity instead of as derivative liabilities. The impact of accounting for public and private warrants as liabilities at fair value resulted in approximately a \$21,949,000 increase to the warrant liability line item at January 14, 2021 and an offsetting decrease to the line item for Class A ordinary shares subject to redemption. There is no change to total shareholders' equity at any reported balance sheet date. In addition, the Company has recorded approximately \$800,000 of costs to operations upon issuance of the warrants to reflect warrant issuance costs. The Company's accounting for the warrants as components of equity instead of as derivative liabilities did not have any effect on the Company's previously reported operating expenses, cash flows, cash, trust account or total shareholders' equity.

The following table presents information about the Company's warrant liabilities that are measured at fair value on a recurring basis at September 30, 2021 and indicates the fair value hierarchy of the valuation inputs the Company utilized to determine such fair value.

Description	At September 30, 2021	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Warrant Liabilities:				
Public Warrants	\$ 8,800,000	\$ 8,800,000	\$ -	\$ -
Private Placement Warrants	4,899,000	-	4,899,000	-
Warrant liability at September 30, 2021	<u>\$ 13,699,000</u>	<u>\$ 8,800,000</u>	<u>\$ 4,899,000</u>	<u>\$ -</u>

At September 30, 2021, the Company values its (a) public warrants based on the closing price at September 30, 2021 in an active market and (b) its private placement warrants based on the closing price of the public warrants since they are similar instruments.

The following table presents the changes in the fair value of warrant liabilities during the nine months ended September 30, 2021:

	Public	Private Placement	Warrant Liabilities
Fair value measurement on December 31, 2020	\$ -	\$ -	\$ -
Fair value at inception of the warrants on January 14, 2021	14,100,000	7,849,000	21,949,000
Change in fair value	(5,300,000)	(2,950,000)	(8,250,000)
Fair value as of September 30, 2021	<u>\$ 8,800,000</u>	<u>\$ 4,899,000</u>	<u>\$ 13,699,000</u>

The warrant liabilities are not subject to qualified hedge accounting.

The Company's policy is to record transfers at the end of the reporting period.

The public warrants were transferred from Level 3 to Level 1, and the private placement warrants were transferred from Level 3 to Level 2, during the period ended June 30, 2021.

Note 6 – Trust Account and Fair Value Measurement

The Company complies with FASB ASC 820, Fair Value Measurements, for its financial assets and liabilities that are re-measured and reported at fair value at each reporting period, and non-financial assets and liabilities that are re-measured and reported at fair value at least annually.

Upon the closing of the Public Offering and the Private Placement, a total of \$300,000,000 was deposited into the Trust Account. The proceeds in the Trust Account may be invested in either U.S. government treasury bills with a maturity of 180 days or less or in money market funds meeting certain conditions under Rule 2a-7 under the Investment Company Act of 1940, as amended, and that invest solely in U.S. government treasury obligations.

In April 2021, the Company's U.S. government treasury bills yielding approximately 0.1% matured and the proceeds were deposited in a money market fund which meets certain conditions under Rule 2a-7 under the Investment Company Act of 1940 and invests only in direct U.S. government obligations. At September 30, 2021, the Trust Account continues to be invested in that money market fund. The Company classifies its U.S. government treasury bills and equivalent securities as held-to-maturity in accordance with FASB ASC 320, "Investments – Debt and Equity Securities." Held-to-maturity securities are those securities which the Company has the ability and intent to hold until maturity.

The following table presents information about the Company's assets that are measured at fair value on a recurring basis as of September 30, 2021 and indicates the fair value hierarchy of the valuation techniques the Company utilized to determine such fair value. Since all of the Company's permitted investments at September 30, 2021 consisted of money market funds meeting certain conditions under Rule 2a-7 under the Investment Company Act of 1940 which invest only in direct U.S. government obligations U.S. government treasury bills, fair values of its investments are determined by Level 1 inputs utilizing quoted prices (unadjusted) in active markets for identical assets or liabilities as follows:

Description	Carrying value at September 30, 2021	Gross Unrealized Holding Gains	Quoted Price Prices in Active Markets (Level 1)
Assets:			
Cash	\$ 1,000	\$ -	1,000
Money Market Fund	300,067,000	-	300,067,000
Total	\$ 300,068,000	\$ -	\$ 300,068,000

Note 7 – Restatement of Previously Issued Financial Statements

Class A Ordinary Shares Subject to Redemption:

In the course of preparing its Form 10-Q on November 12, 2021 (the "Original Filing"), the Company has determined that all of the Class A ordinary shares should be accounted for as redeemable in the Company's financial statements. Previously, the Company had accounted for Class A ordinary shares as redeemable except for the amount of such shares necessary not to be redeemed in order for the Company to maintain a minimum shareholders' equity of \$5,000,001 because the Company had been organized to avoid entering into any transaction that would cause its shareholders' equity to fall below \$5,000,001. In the Original Filing, the Company also revised its earnings per share calculation to allocate net income (loss) pro rata among its Class A and Class B ordinary shares. This presentation contemplates an initial business combination as the most likely outcome of the Company's operations, in which case both classes of ordinary shares share pro rata in the income (loss) of the Company.

After filing the Company's Original Filing, in November 2021, the Company determined that such changes, because of their quantitative materiality, should be considered restatements rather than revisions. Upon further review and in consultation with its accounting consultants and the Audit Committee, the Company has updated this Note 7 in this Form 10Q/A to indicate that the reclassification, and the change in earnings (loss) per share, constitute a restatement and not a revision.

As a result of the above, the Company has recorded all outstanding Class A ordinary shares as Class A ordinary shares subject to redemption in the September 30, 2021 condensed balance sheet and revised earnings (loss) per share to allocate net income (loss) pro rata among to Class A and Class B ordinary shares in the condensed statements of operations in the Original Filing. The effect of these changes on previously issued financial statements is as follows:

	<u>As Previously</u>	<u>Adjustment</u>	<u>As Revised</u>
<i>Condensed Balance Sheet at March 31, 2021</i>			
Class A ordinary shares subject to possible redemption	\$ 269,797,000	\$ 30,203,000	\$ 300,000,000
Class A ordinary shares outstanding	3,216,358	(3,216,358)	-
Additional paid-in capital	\$ 374,000	\$ (374,000)	\$ -
Retained earnings (Accumulated deficit)	\$ 4,625,000	\$ (29,829,000)	\$ (25,204,000)
Total shareholders' equity (deficit)	\$ 5,000,000	\$ (30,203,000)	\$ (25,203,000)
<i>Condensed Statement of Operations for the three months ended March 31, 2021</i>			
Net income per Class A ordinary share – basic and diluted	\$ 0.00	\$ 0.14	\$ 0.14
Net income per Class B ordinary share – basic and diluted	\$ 0.61	\$ (0.47)	\$ 0.14
Weighted average Class A ordinary shares	30,000,00	(4,667,000)	25,333,000
<i>Balance Sheet at June 30, 2021</i>			
Class A ordinary shares subject to possible redemption	\$ 267,836,000	\$ 32,164,000	\$ 300,000,000
Class A ordinary shares outstanding	3,020,300	(3,020,300)	-
Additional paid-in capital	\$ 2,335,000	\$ (2,335,000)	\$ -
Retained earnings (Accumulated deficit)	\$ 2,664,000	\$ (29,829,000)	\$ (27,165,000)
Total shareholders' equity (deficit)	\$ 5,000,000	\$ (32,164,000)	\$ (27,164,000)
<i>Condensed Statement of Cash Flows for the three months ended March 31, 2021</i>			
Initial value of Class A ordinary shares subject to redemption, as restated	\$ 264,361,000	\$ *	\$ *
Change in value of Class A ordinary shares subject to redemption	\$ 5,436,000	\$ (5,436,000)	\$ -
<i>Condensed Statement of Operations for the three months ended June 30, 2021</i>			
Net (loss) per Class A ordinary share – basic and diluted	\$ 0.00	\$ (0.05)	\$ (0.05)
Net income (loss) per Class B ordinary share – basic and diluted	\$ (0.26)	\$ 0.21	\$ (0.05)
<i>Condensed Operations Statement for the six months ended June 30, 2021</i>			
Net income per Class A ordinary share – basic and diluted	\$ 0.00	\$ 0.08	\$ 0.08
Net income (loss) per Class B ordinary share – basic and diluted	\$ (0.35)	\$ 0.43	\$ 0.08
Weighted average Class A ordinary shares	30,000,00	(2,320,000)	27,680,000
<i>Condensed Statement of Cash Flows for the six months ended June 30, 2021</i>			
Initial value of Class A ordinary shares subject to redemption, as restated	\$ 264,361,000	\$ *	\$ *
Change in value of Class A ordinary shares subject to redemption	\$ 3,475,000	\$ (3,475,000)	\$ -

* This item was removed from Non-Cash Activity in the prior and current presentation.

The changes described do not have any impact on the Company's cash position, the balance held in its trust account or its total assets.

Note 8 – Shareholders' Equity

Ordinary Shares:

The authorized ordinary shares of the Company include 500,000,000 Class A ordinary shares, par value, \$0.0001, and 50,000,000 Class B ordinary shares, par value, \$0.0001, or 550,000,000 ordinary shares in total. The Company may (depending on the terms of the Business Combination) be required to increase the authorized number of shares at the same time as its shareholders vote on the Business Combination to the extent the Company seeks shareholder approval in connection with its Business Combination. Holders of the Company's Class A and Class B ordinary shares vote together as a single class and are entitled to one vote for each share of Class A and Class B ordinary shares.

The Founder Shares are subject to vesting as follows: 50% upon the completion of a business combination and then an additional 12.5% on the attainment of each of a series of certain "shareholder return" targets exceeding 20%, 30%, 40% and 50%, as further defined in the agreement. Certain events, as defined in the agreement, could trigger an immediate vesting under certain circumstances. Founder Shares that do not vest within an eight-year period from the closing of the business combination will be cancelled.

At September 30, 2021, after the January 2021 share recapitalization of Class B ordinary shares and the Public Offering including Class A ordinary shares, there were 7,500,000 shares of Class B ordinary shares issued and outstanding, and -0- Class A ordinary shares issued and outstanding (after deducting 30,000,000 Class A ordinary shares subject to possible redemption).

Preference Shares:

The Company is authorized to issue 5,000,000 Preference shares, par value \$0.0001, with such designations, voting and other rights and preferences as may be determined from time to time by the Company's board of directors. At September 30, 2021, there were no Preference shares issued or outstanding.

Note 9 – Commitments and Contingencies

Risks and Uncertainties—COVID-19—Management continues to evaluate the impact of the COVID-19 pandemic on the industry and has concluded that while it is reasonably possible that the virus could have an effect on the Company's financial position, results of its operations and/or search for a target company and/or a target company's financial position and results of its operations, the specific impact is not readily determinable as of the date of these condensed financial statements. The condensed financial statements do not include any adjustments that might result from the outcome of this uncertainty.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the Company's financial condition and results of operations should be read in conjunction with the condensed financial statements and the notes thereto contained elsewhere in this report.

Special Note Regarding Forward-Looking Statements

All statements other than statements of historical fact included in this section and elsewhere in this Form 10-Q regarding the Company's financial position, business strategy and the plans and objectives of management for future operations, are forward-looking statements. When used in this Form 10-Q, words such as "anticipate," "believe," "estimate," "expect," "intend" and similar expressions, as they relate to us or the Company's management, identify forward-looking statements. Such forward-looking statements are based on the beliefs of management, as well as assumptions made by, and information currently available to, the Company's management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors detailed in our filings with the SEC.

Overview

We are a blank check company incorporated on November 3, 2020 as a Cayman Islands exempted company for the purpose of effecting a merger, share exchange, asset acquisition, share purchase, reorganization or similar business combination with one or more businesses or entities. We have not selected any business combination target and we have not, nor has anyone on our behalf, initiated any substantive discussions, directly or indirectly, with any business combination target. We intend to effectuate our initial business combination using cash from the proceeds of this offering and the sale of the private placement warrants, our shares, debt or a combination of cash, equity and debt.

The issuance of additional shares in a business combination:

- ▶ may significantly dilute the equity interest of investors in this offering, which dilution would increase if the anti-dilution provisions in the Class B ordinary shares resulted in the issuance of Class A ordinary shares on a greater than one-to-one basis upon conversion of the Class B ordinary shares;
- ▶ may subordinate the rights of holders of Class A ordinary shares if preference shares are issued with rights senior to those afforded our Class A ordinary shares;
- ▶ could cause a change in control if a substantial number of our Class A ordinary shares are issued, which may affect, among other things, our ability to use our net operating loss carry forwards, if any, and could result in the resignation or removal of our present officers and directors;
- ▶ may have the effect of delaying or preventing a change of control of us by diluting the share ownership or voting rights of a person seeking to obtain control of us;
- ▶ may adversely affect prevailing market prices for our units, Class A ordinary shares and/or warrants; and may not result in adjustment to the exercise price of our warrants.

Similarly, if we issue debt or otherwise incur significant debt, it could result in:

- ▶ default and foreclosure on our assets if our operating revenues after an initial business combination are insufficient to repay our debt obligations;
- ▶ acceleration of our obligations to repay the indebtedness even if we make all principal and interest payments when due if we breach certain covenants that require the maintenance of certain financial ratios or reserves without a waiver or renegotiation of that covenant;

- ▶ our immediate payment of all principal and accrued interest, if any, if the debt is payable on demand;
- ▶ our inability to obtain necessary additional financing if the debt contains covenants restricting our ability to obtain such financing while the debt is outstanding;
- ▶ our inability to pay dividends on our Class A ordinary shares;
- ▶ using a substantial portion of our cash flow to pay principal and interest on our debt, which will reduce the funds available for dividends on our Class A ordinary shares if declared, expenses, capital expenditures, acquisitions and other general corporate purposes;
- ▶ limitations on our flexibility in planning for and reacting to changes in our business and in the industry in which we operate;
- ▶ increased vulnerability to adverse changes in general economic, industry and competitive conditions and adverse changes in government regulation; and limitations on our ability to borrow additional amounts for expenses, capital expenditures, acquisitions, debt service requirements, execution of our strategy and other purposes and other disadvantages compared to our competitors who have less debt.

As indicated in the accompanying financial statements, as of September 30, 2021, we had \$969,000 of cash. Further, we expect to incur significant costs in the pursuit of our initial business combination. We cannot assure you that our plans to complete our initial business combination will be successful.

COVID-19

In December 2019, a novel strain of coronavirus was reported to have surfaced in Wuhan, China, which has and is continuing to spread throughout other parts of the world, including the United States. On January 30, 2020, the World Health Organization declared the outbreak of the coronavirus disease (COVID-19) a “Public Health Emergency of International Concern.” On January 31, 2020, U.S. Health and Human Services Secretary Alex M. Azar II declared a public health emergency for the United States to aid the U.S. healthcare community in responding to COVID-19, and on March 11, 2020 the World Health Organization characterized the outbreak as a “pandemic.” COVID-19 has resulted in a widespread health crisis that has adversely affected the economies and financial markets worldwide. The business of any potential target business with which we consummate a business combination could be materially and adversely affected. Furthermore, we may be unable to complete a business combination if continued concerns relating to COVID-19 restrict travel, limit the ability to have meetings with potential investors or the target company’s personnel, vendors and services providers are unavailable to negotiate and consummate a transaction in a timely manner. The extent to which COVID-19 impacts our search for a business combination will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19 and the actions to contain COVID-19 or treat its impact, among others. If the disruptions posed by COVID-19 or other matters of global concern continue for an extended period of time, our ability to consummate a business combination, or the operations of a target business with which we ultimately consummate a business combination, may be materially adversely affected.

Results of Operations

For the period from November 3, 2020 (date of inception) to September 30, 2021 our activities consisted of formation and preparation for the Public Offering and, subsequent to completion of the Public Offering on January 14, 2021, identifying and completing a suitable Initial Business Combination. As such, in 2021 we had no operations or significant operating expenses until after the completion of the Public Offering in January 2021.

Our normal operating costs since January 14, 2021 include costs associated with our search for an Initial Business Combination (see below), costs associated with our governance and public reporting (see below), and a charge of \$25,000 per month from our Sponsor for administrative services for an aggregate of \$75,000 and \$213,000, respectively, for the three and nine months ended September 30, 2021. Costs associated with our governance and public reporting have increased since the Public Offering and were approximately \$115,000 and \$365,000 for the three and nine months ended September 30, 2021. General and administrative costs also include approximately \$802,000 and \$2,765,000 of professional and consulting fees in the three and nine months ended September 30, 2021, respectively, associated with our review of business combination candidates.

As we identify Initial Business Combination candidates, our costs are expected to increase significantly in connection with investigating potential Initial Business Combination candidates, as well as additional professional, due diligence and consulting fees and travel costs that will be required and professional and other costs associated with negotiating and executing a definitive agreement and related agreements and related required public reporting and governance matters.

Income taxes were \$-0-, for the three and nine months ended September 30, 2021 because we are an exempt Cayman Islands company and are not subject to income tax in the United States or in the Cayman Islands. We did not withdraw any interest from the Trust Account in the three months ended September 30, 2021.

See below regarding other income and expense items associated with the warrant liability.

As discussed further in Note 6 to the condensed financial statements, the Company accounts for its outstanding public and private warrants as components as derivative liabilities in the accompanying unaudited condensed financial statements. As a result, the Company is required to measure the fair value of the public and private warrants at the end of each reporting period and recognize changes in the fair value from the prior period in the Company's operating results for each current period. The statement of operations for the three and nine months ended September 30, 2020 reflects other income from change in fair value of the warrant liability of approximately \$2,490,000 and \$8,250,000 and charges to other expense aggregating approximately \$-0- and \$800,000, respectively, for warrant liability issuance costs.

The Public Offering and the Private Placement closed on January 14, 2021 as more fully described in "Liquidity and Capital Resources" below. At that time, the proceeds in the Trust Account were initially invested in cash. On January 15, 2021, the Company purchased U.S. government treasury bills due in April 2021 and yielding less than 0.01% and at September 30, 2021, the proceeds in the Trust Account are invested in a money market fund that invests solely U.S. government treasury bills. Interest income was approximately \$8,000 and \$68,000 for the three and nine months ended September 30, 2021. As a result of market conditions occurring in connection with the Covid-19 pandemic, interest rates on available investments are historically low. It is unclear how long this condition will persist, or whether it could get worse.

Liquidity and Capital Resources

On January 14, 2021, we consummated the Public Offering of an aggregate of 30,000,000 Units at a price of \$10.00 per unit generating gross proceeds of approximately \$300,000,000 before underwriting discounts and expenses. Simultaneously with the consummation of the Public Offering, we consummated the Private Placement of 5,566,667 Private Placement Warrants, each exercisable to purchase one share of our Class A ordinary shares at \$11.50 per share, to the Sponsor, at a price of \$1.50 per Private Placement Warrant, generating gross proceeds, before expenses, of approximately \$8,350,000.

The net proceeds from the Public Offering and Private Placement were approximately \$301,471,000, net of the non-deferred portion of the underwriting commissions of \$6,000,000 and offering costs and other expenses of approximately \$904,000 (including approximately \$554,000 of offering expenses and approximately \$350,000 of insurance that is accounted for as prepaid expense). \$300,000,000 of the proceeds of the Public Offering and the Private Placement have been deposited in the Trust Account and are not available to us for operations (except amounts to pay taxes, if any). At September 30, 2021 and December 31, 2020, we had approximately \$1,261,000 and \$20,000, respectively, of cash available outside of the Trust Account to fund our activities until we consummate an Initial Business Combination.

Until the consummation of the Public Offering, the Company's only sources of liquidity were an initial purchase of shares of our Class B ordinary share for \$25,000 by the Sponsor, and the availability of loans to us of up to \$300,000 by our sponsor under an unsecured promissory note (the "Note"), a total of \$199,000 was actually loaned by the Sponsor against the issuance of the Note. The Note was non-interest bearing and was paid in full on January 14, 2021 in connection with the closing of the Public Offering, accordingly, no amounts are outstanding under the Note at September 30, 2021.

At September 30, 2021, the Company has approximately \$969,000 in cash and approximately \$1,527,000 in negative working capital. The Company has incurred and expects to continue to incur significant costs in pursuit of its Business Combination. These conditions raise substantial doubt about the Company's ability to continue as a going concern for a period of time within one year after the date that the financial statements are issued. There is no assurance that the Company's plans to consummate a Business Combination will be successful or successful within the Combination Period. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

We do not believe we will need to raise additional funds in order to meet the expenditures required for operating our business prior to our initial business combination, other than funds which may be available from loans from our sponsor, its affiliates or members of our management team. However, if our estimates of the costs of identifying a target business, undertaking in-depth due diligence and negotiating an initial business combination are less than the actual amount necessary to do so, we may have insufficient funds available to operate our business prior to our initial business combination. In order to fund working capital deficiencies or finance transaction costs in connection with an intended initial business combination, our sponsor or an affiliate of our sponsor or certain of our officers and directors may, but are not obligated to, loan us funds as may be required. If we complete our initial business combination, we may repay such loaned amounts out of the proceeds of the trust account released to us. In the event that our initial business combination does not close, we may use a portion of the working capital held outside the trust account to repay such loaned amounts but no proceeds from our trust account would be used for such repayment. Up to \$2,000,000 of such loans may be convertible into warrants of the post-business combination entity at a price of \$1.50 per warrant at the option of the lender. The warrants would be identical to the private placement warrants. The terms of such loans, if any, have not been determined and no written agreements exist with respect to such loans. Prior to the completion of our initial business combination, we do not expect to seek loans from parties other than our sponsor, its affiliates or our management team as we do not believe third parties will be willing to loan such funds and provide a waiver against any and all rights to seek access to funds in our trust account.

We expect our principal liquidity requirements during this period to include legal, accounting, due diligence, travel and other expenses associated with structuring, negotiating and documenting successful business combinations; legal and accounting fees related to regulatory reporting obligations; payment for investment professionals' services and support services; Nasdaq continued listing fees; and general working capital that will be used for miscellaneous expenses and reserves.

Our estimates of expenses may differ materially from our actual expenses. In addition, we could use a portion of the funds not being placed in trust to pay commitment fees for financing, fees to consultants to assist us with our search for a target business or as a down payment or to fund a "no-shop" provision (a provision designed to keep target businesses from "shopping" around for transactions with other companies or investors on terms more favorable to such target businesses) with respect to a particular proposed business combination, although we do not have any current intention to do so. If we entered into an agreement where we paid for the right to receive exclusivity from a target business, the amount that would be used as a down payment or to fund a "no-shop" provision would be determined based on the terms of the specific business combination and the amount of our available funds at the time. Our forfeiture of such funds (whether as a result of our breach or otherwise) could result in our not having sufficient funds to continue searching for, or conducting due diligence with respect to, prospective target businesses.

Moreover, we may need to obtain additional financing to complete our initial business combination, either because the transaction requires more cash than is available from the proceeds held in our trust account, or because we become obligated to redeem a significant number of our public shares upon completion of the business combination, in which case we may issue additional securities or incur debt in connection with such business combination. If we have not consummated our initial business combination within the required time period because we do not have sufficient funds available to us, we will be forced to cease operations and liquidate the trust account.

The Company has until January 14, 2023 to complete an Initial Business Combination. If the Company does not complete an Initial Business Combination by January 14, 2021, the Company will (i) cease all operations except for the purposes of winding up; (ii) as promptly as reasonably possible, but not more than ten business days thereafter, redeem the public shares of Class A ordinary share for a pro rata portion of the Trust Account, including interest, but less taxes payable (and less up to \$100,000 of such net interest to pay dissolution expenses) and (iii) as promptly as reasonably possible following such redemption, dissolve and liquidate the balance of the Company's net assets to its creditors and remaining shareholders, as part of its plan of dissolution and liquidation. The initial shareholders have waived their redemption rights with respect to their founder shares; however, if the initial shareholders or any of the Company's officers, directors or their affiliates acquire shares of Class A ordinary share in or after the Public Offering, they will be entitled to a pro rata share of the Trust Account upon the Company's redemption or liquidation in the event the Company does not complete an Initial Business Combination within the required time period.

In the event of such liquidation, it is possible that the per share value of the residual assets remaining available for distribution (including Trust Account assets) will be less than the price per unit in the Public Offering.

Off-balance sheet financing arrangements

We have no obligations, assets or liabilities which would be considered off-balance sheet arrangements. We do not participate in transactions that create relationships with unconsolidated entities or financial partnerships, often referred to as variable interest entities, which would have been established for the purpose of facilitating off-balance sheet arrangements.

We have not entered into any off-balance sheet financing arrangements, established any special purpose entities, guaranteed any debt or commitments of other entities, or entered into any agreements for non-financial assets.

Contractual obligations

At September 30, 2021, we did not have any long-term debt, capital lease obligations, operating lease obligations or long-term liabilities. In connection with the Public Offering, we entered into an Administrative Support Agreement with Global Partner Sponsor II LLC, our Sponsor, pursuant to which the Company pays Global Partner Sponsor II LLC \$25,000 per month for office space, utilities and secretarial and administrative support.

In connection with identifying an Initial Business Combination candidate and negotiating an Initial Business Combination, the Company may enter into engagement letters or agreements with various consultants, advisors, professionals and others in connection with an Initial Business Combination. The services under these engagement letters and agreements can be material in amount and in some instances can include contingent or success fees. Contingent or success fees (but not deferred underwriting compensation) would be charged to operations in the quarter that an Initial Business Combination is consummated. In most instances (except with respect to our independent registered public accounting firm), these engagement letters and agreements are expected to specifically provide that such counterparties waive their rights to seek repayment from the funds in the Trust Account.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and income and expenses during the periods reported. Actual results could materially differ from those estimates. The Company has identified the following as its critical accounting policies:

Emerging Growth Company

Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies (that is, those that have not had a Securities Act registration statement declared effective or do not have a class of securities registered under the Exchange Act) are required to comply with the new or revised financial accounting standards. The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such an election to opt out is irrevocable. The Company has elected not to opt out of such extended transition period which means that when an accounting standard is issued or revised and it has different application dates for public or private companies, the Company, as an emerging growth company, can adopt the new or revised standard at the time private companies adopt the new or revised standard.

Net Income (Loss) per Share:

Net income (loss) per ordinary share is computed by dividing net income (loss) applicable to ordinary shareholders by the weighted average number of ordinary shares outstanding for the period. The Company has not considered the effect of the warrants sold in the Public Offering and Private Placement to purchase an aggregate of 15,566,667 Class A ordinary shares in the calculation of diluted income (loss) per share, since their inclusion would be anti-dilutive under the treasury stock method. As a result, diluted income (loss) per ordinary share is the same as basic loss per ordinary share for the period.

The Company complies with the accounting and disclosure requirements of FASB ASC Topic 260, "Earnings Per Share." The Company has two classes of shares, which are referred to as Class A ordinary shares and Class B ordinary shares. Income and losses are shared pro rata among the two classes of shares. Net income (loss) per ordinary share is calculated by dividing the net income (loss) by the weighted average number of ordinary shares outstanding during the respective period.

The following table reflects the earnings per share after allocating income between the shares based on outstanding shares.

	Three months ended September 30, 2021		Nine months ended September 30, 2021	
	Class A	Class B	Class A	Class B
<i>Numerator:</i>				
Basic and diluted net income per ordinary share:				
Allocation of income – basic and diluted	\$ 1,205,000	\$ 301,000	\$ 3,340,000	\$ 835,000
<i>Denominator:</i>				
Basic and diluted weighted average ordinary shares:	30,000,000	7,500,000	28,462,000	7,468,000
Basic and diluted net income per ordinary share	\$ 0.04	\$ 0.04	\$ 0.12	\$ 0.12

Concentration of Credit Risk:

Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash accounts in a financial institution, which at times, may exceed the Federal depository insurance coverage of \$250,000. The Company has not experienced losses on these accounts and management believes the Company is not exposed to significant risks on such accounts.

Financial Instruments:

The fair value of the Company's assets and liabilities (excluding the warrant liability), which qualify as financial instruments under Financial Accounting Standards Board Accounting Standards Codification ("FASB ASC 820"), "Fair Value Measurements and Disclosures," approximates the carrying amounts represented in the financial statements, primarily due to their short-term nature.

Use of Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the balance sheet and the reported amounts of expenses during the reporting period. Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statement, which management considered in formulating its estimate, could change in the near term due to one or more future confirming events. One of the more significant estimates included in these financial statements is the determination of the fair value of the warrant liability. Such estimates may be subject to change as more current information becomes available and accordingly the actual results could differ significantly from those estimates.

Deferred Offering Costs:

The Company complies with the requirements of the FASB ASC 340-10-S99-1 and SEC Staff Accounting Bulletin (SAB) Topic 5A— "Expenses of Offering." Costs incurred in connection with preparation for the Public Offering total approximately \$17,054,000 including \$16,500,000 of underwriters' discount. Such costs were allocated among the equity and warrant liability components and approximately \$16,253,000 has been charged to equity for the equity components based on the relative fair-value of the warrants and approximately \$800,000 has been charged to other expense for the warrant liability components upon completion of the Public Offering.

Class A ordinary shares Subject to Possible Redemption:

As discussed in Note 3, all of the 30,000,000 Class A ordinary shares sold as part of the Units in the Public Offering contain a redemption feature that allows for their redemption under the Company's liquidation or tender offer/shareholder approval provisions. In accordance with FASB ASC 480, redemption provisions not solely within the control of the Company require the security to be classified outside of permanent equity. Ordinary liquidation events, which involve the redemption and liquidation of all of the entity's equity instruments, are excluded from the provisions of FASB ASC 480. Although the Company has not specified a maximum redemption threshold, its articles of association provide that in no event will it redeem its Public Shares in an amount that would cause its net tangible assets (shareholders' equity) to be less than \$5,000,001. However, because all of the Class A ordinary shares are redeemable, all of the shares are recorded as Class A ordinary shares subject to redemption on the enclosed balance sheet. See also, Note 7, regarding a revision to the presentation of redeemable shares in these financial statements and the effect on previously reported financial statements.

The Company recognizes changes immediately as they occur and adjusts the carrying value of the securities at the end of each reporting period. Increases or decreases in the carrying amount of redeemable Class A ordinary shares are affected by adjustments to additional paid-in capital. Accordingly, at September 30, 2021, 30,000,000 of the 30,000,000 Public Shares were classified outside of permanent equity.

Income Taxes:

FASB ASC 740 prescribes a recognition threshold and a measurement attribute for the balance sheet recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The Company's management determined that the Cayman Islands is the Company's major tax jurisdiction. There were no unrecognized tax benefits as of September 30, 2021. The Company recognizes interest and penalties related to unrecognized tax benefits as income tax expense. No amounts were accrued for the payment of interest and penalties at September 30, 2021. The Company is currently not aware of any issues under review that could result in significant payments, accruals or material deviation from its position. The Company is subject to income tax examinations by major taxing authorities since inception.

The Company is considered an exempted Cayman Islands Company and is presently not subject to income taxes or income tax filing requirements in the Cayman Islands or the United States. As such, the Company's tax provision was zero for the periods presented. The Company's management does not expect that the total amount of unrecognized tax benefits will materially change over the next twelve months.

Warrant Liability

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 480, Distinguishing Liabilities from Equity ("ASC 480") and ASC 815, Derivatives and Hedging ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own ordinary shares, among other conditions for equity classification. This assessment, which requires the use of professional judgment, is conducted at the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded as a liability at their initial fair value on the date of issuance, and each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the statement of operations. Costs associated with issuing the warrants accounted for as liabilities are charged to operations when the warrants are issued. The fair value of the warrants was estimated using Level 1 observable inputs.

Recent Accounting Pronouncements:

In August 2020, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2020-06, Debt — Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging — Contracts in Entity's Own Equity (Subtopic 815-40) ("ASU 2020-06") to simplify accounting for certain financial instruments. ASU 2020-06 eliminates the current models that require separation of beneficial conversion and cash conversion features from convertible instruments and simplifies the derivative scope exception guidance pertaining to equity classification of contracts in an entity's own equity. The new standard also introduces additional disclosures for convertible debt and freestanding instruments that are indexed to and settled in an entity's own equity. ASU 2020-06 amends the diluted earnings per share guidance, including the requirement to use the if-converted method for all convertible instruments. ASU 2020-06 is effective January 1, 2022 and should be applied on a full or modified retrospective basis, with early adoption permitted beginning on January 1, 2021. The Company is currently evaluating the impact that the pronouncement will have on the financial statements.

Management does not believe that any other recently issued, but not yet effective, accounting pronouncements, if currently adopted, would have a material effect on the Company's condensed financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The net proceeds of our IPO and a portion of the proceeds of our concurrent sale of private placement warrants are held in a trust account invested in U.S. Government Treasury obligations with a maturity of 185 days or less or in money market funds meeting certain conditions under Rule 2a-7 under the Investment Company Act of 1940, as amended, and which invest only in direct U.S. Government Treasury obligations. Due to the short-term nature of these investments, we believe there will be no associated material exposure to interest rate risk. However, if the interest rates of U.S. Government Treasury obligations become negative, we may have less interest income available to us for the payment of taxes, and a decline in the value of the assets held in the trust account could reduce the amount of principal in the trust account below the amount initially deposited in the trust account.

ITEM 4. CONTROLS AND PROCEDURES

Warrant liability –

On April 12, 2021, the staff at the Securities and Exchange Commission (the "SEC") issued a statement on Accounting and Reporting Considerations for Warrants Issued by Special Purpose Acquisition Companies ("SPACs") (the "SEC Statement"). In the SEC Statement, the SEC staff noted that certain provisions in the typical SPAC warrant agreement may require that the warrants be classified as a liability measured at fair value, with changes in fair value reported each period in earnings, as compared to the historical treatment of the warrants as equity, which has been the practice of most SPACs, including us. We had previously classified our private placement warrants and public warrants, which we issued on January 14, 2021, as equity (for a full description of our private placement warrants and public warrants, refer to the registration statement on Form S-1 (File No. 333- 251558 and 333-252033), filed in connection with the Company's initial public offering, declared effective by the SEC on January 11, 2021).

Based on the guidance in Accounting Standards Codification (“ASC”) 815-40, “Derivatives and Hedging — Contracts in Entity’s Own Equity”, we have since concluded that provisions in the warrant agreement preclude the warrants from being accounted for as components of equity. As the warrants meet the definition of a derivative as contemplated in ASC 815, the warrants should have been recorded as derivative liabilities on the balance sheet and measured at fair value at issuance and reported as such at each subsequent reporting date in accordance with ASC 820, “Fair Value Measurement,” with changes in fair value recognized in the subsequent statements of operations for a period that included the change. Further, ASC 815 requires that upfront costs and fees related to items for which fair value accounting is applied (in this case, our warrant liabilities) should have been recognized as expense as incurred.

Class A Ordinary Shares Subject to Redemption –

In the course of preparing the Original Filing, the Company had determined, in consultation with its accounting consultants that a change was required to be made in the manner in which the Company had previously reported the value of the redeemable Class A ordinary shares issued in connection with the Company’s initial public offering (“IPO”) [NOTE TO PRINTER – UNBOLD “IPO”]. The Company had previously determined that the aggregate value of such redeemable Class A ordinary shares was equal to their aggregate redemption value after taking into account the prohibition, under the Company’s Amended and Restated Memorandum and Articles of Association, against the Company repurchasing or redeeming Class A ordinary shares or entering into a business combination if such transaction would cause the Company’s net tangible assets to fall below \$5,000,001. However, in the course of preparing the Original Filing, the Company determined, in consultation with its advisors that, because each Class A ordinary share was, by its terms, redeemable, the aggregate value of the Class A ordinary shares should be equal to their aggregate redemption value without taking into account the prohibition against transactions that would reduce net tangible assets below \$5,000,001. The Company adopted this change in the Original Filing by reclassifying the requisite amount of Class A ordinary shares from permanent to temporary equity, with the offset recorded to additional paid-in capital (to the extent available), accumulated deficit and ordinary shares. Also, in the Original Filing, the Company revised its earnings per share calculation to allocate net income (loss) pro rata among its Class A and Class B ordinary shares. This presentation contemplates an initial business combination as the most likely outcome of the Company’s operations, in which case, both classes of ordinary shares share pro rata in the income (loss) of the Company.

The Company presented the reclassification, and the change in earnings (loss) per share, as revisions that did not require the restatement of previously issued financial statements and presented the effect of the reclassification on its previously filed financial statements in Note 7 to the condensed financial statements in the Original Filing. After filing the Original Filing, in November 2021, the Company determined that such revisions, because of their quantitative materiality, should be considered restatements rather than revisions. Upon further review, and in consultation with its accounting consultants and Audit Committee, the Company has updated Note 7 in this Form 10Q/A to indicate that the reclassification, and the change in earnings (loss) per share, constitute a restatement and not a revision and also to include in such Note 7 the effect of the restatement n earnings (loss) per share on its previously issued financial statements.

In addition, the Company’s management has concluded that, during the periods referred to above, to the extent that the Company’s internal control over financial reporting did not result in the classification of the entire aggregate value of the Class A ordinary shares as temporary equity, and did not allocate net income (loss) pro rata among Class A and Class B ordinary shares for the purpose of presenting earnings (loss) per share, the Company’s disclosure controls and procedures were not effective, which represents a material weakness.

Evaluation of Disclosure Controls and Procedures

We will be required to comply with the internal control requirements of the Sarbanes- Oxley Act for the fiscal year ending December 31, 2021. Only in the event that we are deemed to be a large accelerated filer or an accelerated filer and no longer qualify as an emerging growth company would we be required to comply with the independent registered public accounting firm attestation requirement on internal control over financial reporting. Further, for as long as we remain an emerging growth company as defined in the JOBS Act, we intend to take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not “emerging growth companies” including, but not limited to, not being required to comply with the independent registered public accounting firm attestation requirement.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in company reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Our management evaluated, with the participation of our chief executive officer and chief financial officer (our “Certifying Officers”), the effectiveness of our disclosure controls and procedures as of September 30, 2021, pursuant to Rule 13a-15(b) under the Exchange Act. Based upon that evaluation, our Certifying Officers concluded that our disclosure controls and procedures were not effective as of September 30, 2021 due to the material weakness in our internal controls over financial reporting relating to our accounting for complex financial instruments. In light of this material weakness, we performed additional analyses as deemed necessary to ensure that our unaudited interim financial statements were prepared in accordance with U.S. generally accepted accounting principles. Accordingly, management believes that the financial statements included in this Quarterly Report on Form 10-Q/A present fairly in all material respects our financial position, results of operations and cash flows for the periods presented.

We note that the non-cash adjustments to our financial statements made as a result of the restatement do not impact the amounts previously reported for our cash and cash equivalents or total assets.

We expect to assess the internal controls of our target business or businesses prior to the completion of our initial business combination and, if necessary, to implement and test additional controls as we may determine are necessary in order to state that we maintain an effective system of internal controls. A target business may not be in compliance with the provisions of the Sarbanes-Oxley Act regarding the adequacy of internal controls. Many small and mid-sized target businesses we may consider for our initial business combination may have internal controls that need improvement in areas such as:

- ▶ staffing for financial, accounting and external reporting areas, including segregation of duties;
- ▶ reconciliation of accounts;
- ▶ proper recording of expenses and liabilities in the period to which they relate;
- ▶ evidence of internal review and approval of accounting transactions;
- ▶ documentation of processes, assumptions and conclusions underlying significant estimates; and
- ▶ documentation of accounting policies and procedures.

Because it will take time, management involvement and perhaps outside resources to determine what internal control improvements are necessary for us to meet regulatory requirements and market expectations for our operation of a target business, we may incur significant expenses in meeting our public reporting responsibilities, particularly in the areas of designing, enhancing, or remediating internal and disclosure controls. Doing so effectively may also take longer than we expect, thus increasing our exposure to financial fraud or erroneous financing reporting.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting occurred during the fiscal quarter of 2021 covered by this Quarterly Report on Form 10-Q/A that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. In light of the material weakness in our internal controls over financial reporting relating to our accounting for complex financial instruments, we have enhanced our processes to identify and appropriately apply applicable accounting requirements to better evaluate and understand the nuances of the complex accounting standards that apply to our financial statements including making greater use of third-party professionals with whom we consult regarding complex accounting applications. The elements of our remediation plan can only be accomplished over time, and we can offer no assurance that these initiatives will ultimately have the intended effects. We believe our efforts will enhance our controls relating to accounting for complex financial transactions, but we can offer no assurance that our controls will not require additional review and modification in the future, including to the extent industry accounting practices may evolve over time.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 1A. RISK FACTORS

As of the date of this Quarterly Report on Form 10-Q there has been a change to the risk factors disclosed in our Prospectus filed with the SEC on January 11, 2021 and our Form 10-Q filed with the SEC on May 20, 2021; see below. Any of these factors, including that added below, could result in a significant or material adverse effect on our results of operations or financial condition. Additional risk factors not presently known to us or that we currently deem immaterial may also impair our business or results of operations. We may disclose changes to such risk factors or disclose additional risk factors from time to time in our future filings with the SEC.

We have identified a material weakness in our internal control over financial reporting as of September 30, 2021. If we are unable to develop and maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results in a timely manner, which may adversely affect investor confidence in us and materially and adversely affect our business and operating results.

We have identified, in light of reclassification of our redeemable Class A ordinary shares as temporary equity and the need to restate net earnings (loss) per share, a material weakness in our internal controls over financial reporting relating to our accounting for complex financial instruments. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented, or detected and corrected on a timely basis.

Effective internal controls are necessary for us to provide reliable financial reports and prevent fraud. Measures to remediate material weaknesses may be time-consuming and costly and there is no assurance that such initiatives will ultimately have the intended effects. If we identify any new material weaknesses in the future, any such newly identified material weakness could limit our ability to prevent or detect a misstatement of our accounts or disclosures that could result in a material misstatement of our annual or interim financial statements. In such case, we may be unable to maintain compliance with securities law requirements regarding timely filing of periodic reports in addition to applicable stock exchange listing requirements, investors may lose confidence in our financial reporting and adversely affect our business and operating results. We cannot assure you that the measures we have taken to date, or any measures we may take in the future, will be sufficient to avoid potential future material weaknesses.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Private Placement

On January 14, 2021, we consummated a private placement of an aggregate 5,566,667 warrants (“Private Placement Warrants”) at a price of \$1.50 per Private Placement Warrant, generating total proceeds of approximately \$8,350,000. The Private Placement Warrants, which were purchased by our sponsor Global Partner Sponsor II, LLC are substantially similar to the warrants included in the units issued in our Public Offering (the “Public Warrants”), except that if held by the original holder or their permitted assigns, they (i) may be exercised for cash or on a cashless basis, (ii) are not subject to being called for redemption and (iii) are subject to certain limited exceptions, will be subject to transfer restrictions until 30 days following the consummation of our initial business combination. If the Private Placement Warrants are held by holders other than its initial holders, the Private Placement Warrants will be redeemable by the Company and exercisable by the holders on the same basis as the Public Warrants. The sale of the Private Placement Warrants was made pursuant to an exemption from registration contained in Section 4(a)(2) of the Securities Act of 1933, as amended (“Securities Act”).

Use of Proceeds from the Initial Public Offering

On January 14, 2021, we consummated our Public Offering of 30,000,000 units, with each unit consisting of one share of our Class A ordinary shares and one detachable redeemable warrant (the “Detachable Redeemable Warrants”) and the contingent right to receive, in certain circumstances, in connection with the business combination, one-sixth of one distributable redeemable warrant for each public share that a public shareholder holds and does not redeem in connection with our initial business combination (the “Distributable Redeemable Warrants” and together with the Detachable Redeemable Warrants, the Redeemable Warrants). Each whole Redeemable Warrant offered in the Public Offering is exercisable to purchase one share of our Class A ordinary shares. Only whole Redeemable Warrants may be exercised. Each whole Redeemable Warrant is exercisable to purchase one share ordinary share at an exercise price of \$11.50 per whole share. The warrants will become exercisable on the later of (i) 30 days after the completion of the initial business combination and (ii) 12 months from the closing of the Public Offering. The warrants expire five years after the completion of the initial business combination or earlier upon redemption or liquidation. Once the warrants become exercisable, the warrants will be redeemable in whole and not in part at a price of \$0.01 per warrant upon a minimum of 30 days’ notice if, and only if, the last sale price of the Company’s Class A ordinary share equals or exceeds \$18.00 per share for any 20 trading days within a 30 trading day period. The Units in the Public Offering were sold at an offering price of \$10.00 per unit, generating total gross proceeds of approximately \$300,000,000. UBS Investment Bank and RBC Capital Markets acted as joint book-runner managers for the Public Offering. The securities sold in the Public Offering were registered under the Securities Act on a registration statement on Form S-1 (No. 333-251558). The SEC declared the registration statement effective on January 11, 2021.

We paid a total of approximately \$6,000,000 in underwriting discounts and commissions and approximately \$554,000 for other costs and expenses related to the Public Offering. In addition, the underwriters for the Public Offering agreed to defer payment of approximately \$10,500,000 in underwriting discounts and commissions, which amount will be payable upon consummation of our initial business combination, if consummated. We also repaid the promissory note to our Sponsor from the proceeds of the Public Offering.

After deducting the underwriting discounts and commissions (excluding the deferred portion of approximately \$10,500,000 in underwriting discounts and commissions, which amount will be payable upon consummation of our Business Combination, if consummated) and the offering expenses, the total net proceeds from our Public Offering and the private placement of the Private Placement Warrants were approximately \$301,471,000 of which approximately \$300,000,000 (or \$10.00 per unit sold in the Public Offering) was placed in the Trust Account. As of March 31, 2021, approximately \$1.4 million was held outside the Trust Account and will be used to fund (a) the unpaid offering costs aggregating approximately \$70,000 and (b) the Company's operating expenses. The proceeds held in the trust account may be invested by the trustee only in U.S. government treasury bills with a maturity of 185 days or less or in money market funds investing solely in U.S. government treasury obligations and meeting certain conditions under Rule 2a-7 under the Investment Company Act. See also the Current Report on Forms 8-K filed by the Company on January 21, 2021.

In connection with the closing of the Public Offering a share recapitalization of 312,500 shares was made to the holders of 7,187,500 shares of Class B ordinary share (increasing the total number of shares of Class B ordinary shares outstanding to 7,500,000) so that the initial shareholders of the Company would collectively own 20.0% of the issued and outstanding ordinary shares of the Company after the Public Offering.

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

Pursuant to Rule 13a-14(a) and Rule 15d-14(a) under the
Securities Exchange Act of 1934
(Section 302 of the Sarbanes-Oxley Act of 2002)

I, Paul J. Zepf, certify that:

1. I have reviewed this Amended Quarterly Report on Form 10-Q/A of Global Partner Acquisition Corp II;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) [omitted pursuant to the transition period exemption for newly public companies.]
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
